

2023 SIS SUMMER CAMP WEEKLY THEMES

Love what you Sow, Eat what you Grow July 3-7

Nothing tastes better than food you grow yourself! This week we will dig into how and where fruits and veggies of the rainbow grow. Some garden work will be part of each day, as well as some yummy taste testing.

Animal Adaptations and Look-a-Like Creatures July 10-14

Is it an alligator or a crocodile? A leopard or a jaguar? The wild world of animals inspires questions at every turn. Children will really sink their teeth into this week, designing their own creature and habitat as they learn about some of nature's most amazing creatures.

Holiday-a-Day July 17-21

Get your passport ready as we travel across five continents in five days learning and celebrating some lesser-known holidays from around the world. Add in a little geography, some map skills, and an appreciation for varied cultures and we can get this party started.

Wet, Wild, and Weird July 24-28

This water-themed week is sure to "wet" your appetite for fun. Water plays such an important role on our earth. We will learn about different bodies of water and the animals that live there, as well as how to help keep the water on our planet clean. Waterslide design will wrap up this week and we hope to even test out some of our plans.

Summer is STEAM'N! July 31-August 4

STEAM shouldn't be limited to the kitchen or the science lab! This week we are taking it outdoors and into NATURE. From symmetry to structures, our future artists and engineers will use things found in our environment to observe, experiment, craft, and build.

Closing Camp Out August 7-11

Summer wouldn't be summer without a little (day) camping. Try your hand at setting up a tent, building a shelter, and learning some outdoor safety tips and tricks. A leisurely pretend (cardboard) boat ride and some (play) fishing will leave you recharged and ready to roast some marshmallows as we say goodbye to the summer of 2023
